Definition: An indication that something is going to happen in the future.

Definition: a simile is for comparing one thing to another to make the description more vivid.

Definition: In this book, eyes are one of the symbols

Why? Foreshadowing allows the readers to understand something would happen later on, which makes them want to keep on reading. When S.E. Hinton uses foreshadowing, it makes sense in the end as the book was a school assignment.

Why? Similes help people by giving them a visual to compare what the author is talking about, so we could understand.

Why? The author used eye colour to describe the characters. (e.g. Ponyboy and Cherry have similar eye colour, so they would have some sort of connection.)
