

Dragon Notes Reflection

Noa Yehudayan

I feel that I would get an ME for this summative because I was able to contribute as much as I could to the group with the right resources and supporting evidence for my portion of the video. When talking about social and historical values, I was able to reflect on this with Zoe's perception of men and how they view her. These social normalities helped me understand how society perceived women to be in the 1960s. I was able to use a range of vocabulary when talking about Zoe's attitude towards Earl and how she disagreed with the so-called "Heidi." The organisation throughout the video such as transitions, demonstrated a clear understanding of how the author, Lorrie Morre, was able to portray Zoe's character to deny women's place in society. I backed up each of my evidence using the dialog as well as imagery to describe Zoe's life. My evidence showed diction as well as the voice and tone of the relationship between Earl and Zoe.
